(57) Abstract: The present invention relates to method for the
isolation of at least one biologically active substance from an
industrial dairy by-product or waste flow, comprising - select-
ing at least one industrial dairy waste or by-product flow con-
taining at least one biologically active substance; - bringing the
at least one industrial dairy waste or by-product flow into con-
tact with at least one solid insoluble support material for suffi-
cient time to cause the at least one biologically active substance
to selectively adsorb on said support material; - recovering the
insoluble solid support material carrying the adsorbed at least
one biologically active substance.
